**HOP-UP
SYSTEM**

1 Outlook/Structure

Always set the safety switch to the safe position when you are not firing or during

CA1911A1

2 Specification

Data of Gas Blowback Pistol

Name	CA1911A1	
Weight	1kg	
Barrel Length	112mm	
Barrel Caliber	6.08mm	
Pellet Capacity	24+1	
Pellet	6mm BB	

3 Operation

1 Gas Injection

To refill the gas with the gas container in vertical position.

Be careful! The releasing gas is harmful to your eyes and face. Avoid facing the magazine directly when you try to release the gas by pressing the release valve.

2 Loading BB Bullet

High precision BB pellets is required for the operation of this magazine. Avoid invasion by dust and dirt into the magazine to prevent malfunctions.

Load BB pellet in the magazine, 6 mm (15 rounds only). Please follow the illustration diagrams to load the BB pellets.

Never use any used BB pellets

1.

2.

3.

4.

Do not compress and release the magazine spring without BB pellet is loaded. It may be damage the magazine.

③ Loading & Releasing The Magazine

While loading the magazine, push it inward to the bottom till a "tick" sound is heard. Press the magazine release catch, the magazine will fall off from the stock.

Attention: use hand to receive the magazine to prevent it from falling down to the ground.

④ First Load For Firing

1. Pull the slide backward to a specific position.

2. Then release and let the slide moving forward to load the pellet into the firing chamber, and retain the hammer at the rear position, ready for firing.

⑤ Safety Operation

Don't pull the trigger if the Grip Safety hasn't been pushed in, otherwise it may be damaged.

A

Hammer can only work when the safety switch stays at "OFF" position. Don't operate the trigger when the safety switch is at "ON" position. Otherwise, the pistol may be damaged.

B

Under this state, the safety switch is at "OFF" position.

C

Grip Safety function can be applied automatically and grip the apron block tightly to release it.

6 Shooting

1

- ① When the slide is pulled back and released forward. The BB pellet is loaded in the firing chamber, press the trigger to fire the loaded BB pellet.

2

- ② After the last BB pellet is fired, the slide will be retained in the back position, it means an empty magazine condition. If you want to resume the firing, insert a new fully loaded magazine; press the slide lock to release the slide and to reload the BB pellet.

After a long and continued firing practice, the low temperature of the magazine will cause a reduced gas pressure as well as the low velocity of pellet. It is a normal condition and not a trouble.

Never practice the reverse firing because which action causes the gas can not evaporate and the vaporized gas easy to damage the parts.

7 Application of HOP UP

1. The adjustable HOP UP system can make the trajectory of BB pellets slightly adjustable, and compared with the launcher which makes pellets moving at a parabola trajectory, it can aim at a farther target and shoot the pellets for a long range. Unlike the fixed one, the HOP UP turntable and HOP UP Pole can be adjusted slightly by a light touch. It is a wonderful HOP UP system.

2. Adjust the HOP UP in 1~5 sequence.

- Turn the HOP UP turntable slowly towards the "HOP" direction till the BB pellets can be shot horizontally.
- Too tightness will cause a poor shooting, so, complete the adjustment till the trajectory is horizontal.
- Forceful turn of the HOP UP turntable to a certain degree may cause damage.

CAUTION Never use any used BB pellets

Use new 6mm BB pellet is a must

Please don't use any BB pellet which is not completed.

Please don't use any broken BB pellet.

Please don't use any BB pellet which diameter exceed 6 mm.

4 How to disassembly the pistol for basic maintenance

1 Detach the magazine first.

2 Press the slide release button and push forward the slide.

3

4 Then, remove the whole slide apart from the frame.

5 Press the recoil spring rod forward and remove it from the slide.

5 Maintenance

- ① If the pellets are clogged, remove the magazine and use the cleaning rod to eject the pellet.

- ② Then spray silicone oil for 0.5 to 1 sec in the arrow area; and clean the oil from the chamber using the cleaning rod (with cotton) to complete the maintenance.

- ③ Cut a cotton cloth to the size as shown above and insert one end into the hole in the rod. (Adjust the length of cloth for smooth entry into the barrel.)

CAUTION: Always begin the maintenance by returning the hop up adjustment lever to NORMAL.

*Always empty remaining gas in the magazine before storage.

- ④ After shooting and storage

- ① After the shooting practice, 1) take off the magazine from the stock, 2) push down the slide lock to hold the slide in place and 4) press the trigger to release the hammer.

②

- ③ Attention: Take out any pellet from inside.

6 **! WARNING**

WARNING

Never point the muzzle at people or animals.

WARNING

Never load the pistol if you don't intend to fire it.

WARNING

Please keep the pistol far away from children.

WARNING
